- 184 cities + Fernando de Noronha
- State population: 9,616,621
- Capital: Recife

City of Recife

• Population: 1.661.017 (9th largest in Brazil)

City of Recife

• Climate: tropical

About the University of Pernambuco - UPE

Founded in 1990, UPE is one of the biggest universities of the region, including:

15 faculties;

Around 18,000 students, between undergraduate and postgraduate;

11 campuses;

207 courses.

Throughout the state of Pernambuco. Our main goal is to contribute to the sustainable development of the state through teaching, research and university extension activities.

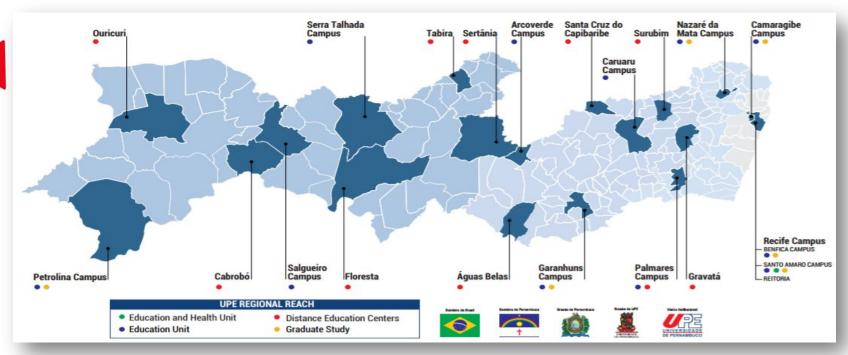

UPE Campuses and Courses

About the Polytechnic School of Pernambuco - POLI

- POLI is part of Benfica campus of UPE;
- Standing in Recife, it was founded in 1912 by visionary professors of the renowned Gymnasium of Pernambuco;
 - Around 3,000 students, between undergraduate and postgraduate;
 - 9 undergraduate courses
 - 3 master degree courses
 - o 150 professors from a variety of areas

About the Polytechnic School of Pernambuco - POLI

- The University lists on the ranks as one of the 10 oldest engineering colleges in Brazil;
- It was lately incorporated to FESP (1966) then to UPE in its foundation, in 1990.

Postgraduate Courses

- Computing Engineering;
- Systems Engineering;

>_I

Extension and Research Projects

• Safe and Sustainable Development
DESS is a teaching, extension, and research
group, specialized in applying safety and

sustainability concepts to the construction and transportation fields.

• SlumPE

It main objective is learning civil engineering in practice, developing high-tech concrete and participating in university competitions.

>E

Extension and Research Projects

• Tenpest Aerodesign
In the area of Aeronautical Engineering, the students get involved with real cases of aeronautical project development. The team participates annually in the SAE Brazil Aerodesign competition.

• Corisco Baja team
It is a competition group that develop the construction of a car putting in practice the knowledge of mechanical engineering gained in class, they also compete in SAE's Brazil events.

Extension and Research Projects

• **POLI Junior engineering** A junior company that proposes to develop important skills for an engineer directly in the labor market.

• Carranca

An extension and research group focused in robotic and technology that also participates in competitions throughout the year against other universities.
